Know what's below. Contact 811 before you dig.

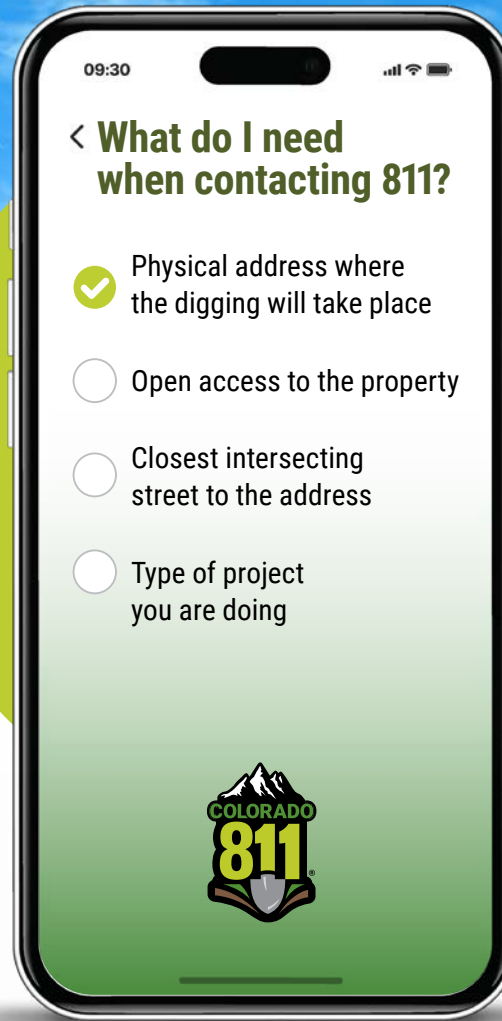

4 Steps to Digging Safely

1 Contact 811: Visit colorado811.org or call 811 to request a free underground utility line locate. This service protects public underground utilities like gas, electric, water, and internet lines. Remember, private utilities won't be included in this service.

2 Wait and Track your Request: Wait 3 business days and track your request on colorado811.org. The utility companies will respond with a message indicating the status of your request.

3 Respect the Marks: If utilities are present, the location of the utility line will be identified by paint and/or flags. Once marked, maintain the marks to ensure they remain visible while digging.

4 Dig Carefully: Always dig cautiously with hand tools when digging within 18 inches of a utility line.

Know the Colors

Underground utilities and key spots are marked with colors. Here is the national color code used.

-  Electric, Power
-  Gas, Oil
-  Communication, TV, Fiber, Internet
-  Drinkable Water
-  Irrigation, Reclaimed Water
-  Sewer, Drain Lines
-  Planned Digging
-  Temporary Markings

Digging Around a Marked Utility Line

Do not dig directly on the marks provided. Avoid digging within 18 inches around the marked utility line and dig cautiously.

Tolerance Zone

Private Utilities

Remember: It's not just public utility lines underground! Your property may have private lines underground like a sprinkler system or gas lines for barbecues or fire pits, the marking of these private lines are not provided in this service. We recommend hiring a private locating service separately to avoid damage. Visit colorado811.org for details and a list of private locate companies.
